

Proposal for a master thesis

“Example title”

1 Introduction

The proposal should have a maximum length of five text pages (plus preliminary outline, schedule and literature). If it contains the ”Forschungsseminar”, it should be longer. It may also be less, if it contains everything necessary. The proposal should include the motivation for the topic as well as relevant sources [1]. If the following sections are to be referenced, this can be done with [section 2](#) or with [Section 3](#) depending on whether it should be written in upper or lower case (only relevant in English).

2 Objective

What should be achieved? Elaboration of the research questions.

3 Background

This section should present the basics that are relevant for working on the topic. Alternatively, the basics can be presented first and the objective can be derived from this.

4 Approach

Own planned contribution to the achievement of the objective.

5 Preliminary structure

This section should contain a draft of the chapter order and structure. Please also plan the number of pages for each chapter. This helps you to write a thesis with a normal size.

1. Introduction (2)

1.1. Motivation

1.2. ...

6 Time and work schedule

You should also develop a time schedule for your planned approach. When planning your schedule, be sure to take into account other things that will take up your time during the thesis, such as lectures, exams, and extracurricular activities. Feel free to discuss this with your supervisor.

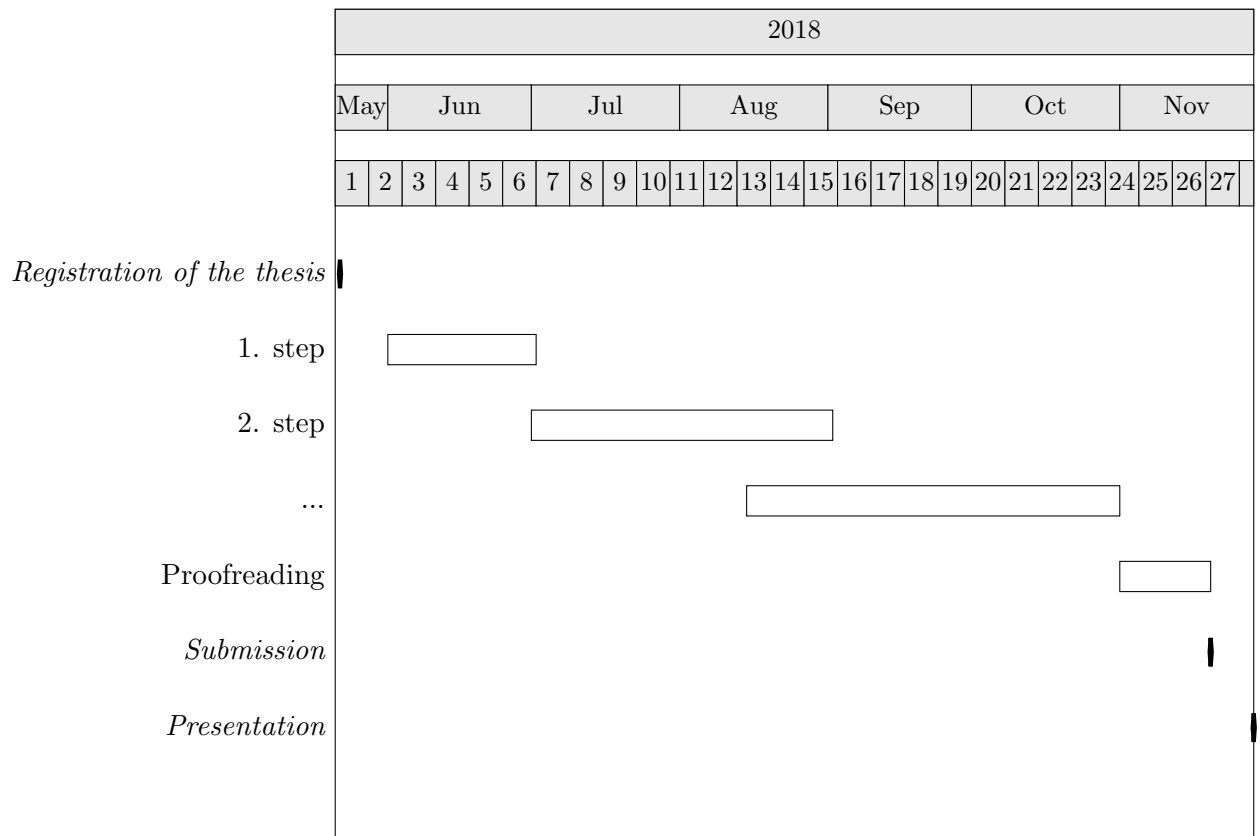

Figure 1: Time schedule

- 21.05.2018: Registration of the thesis (please allow sufficient time for the proposal)
- 01.07.2018: Completion step 1
- 01.08.2018: Completion step 2
- 01.09.2018: ...
- 20.11.2018: Submission
- 03.12.2018: Presentation
